You get a great sense of being at each of the featured locations along with some useful information. Although fairly short it's well done and for the price I would highly recommend to those interested in space exploration. I look forward to any future additions.. It is a great experience for anyone who loves astronomy. The sights are basically realistic and scientific facts have been taken into account. Good way to learn more about the space missions. Hopefully more content will be added soon.. If you remember and watched "The sky at night" this is for you.. It is a great experience for anyone who loves astronomy. The sights
